

Mentor biography:

Name: Nancy Platt

Education level: RN, BSN

Areas of expertise: See below

Number of years in the early care and education field: 20+

Regions in which I would like to mentor/coach: I

What mentor/coaching means to me: Helping people succeed at their goals and be all they want to be

Hello! I am Nancy Platt, Rn, BSN, and I am an Idaho Stars Mentor and Trainer. I completed the National Training Institute Train the Trainer program through Chapel Hill, NC for Child Care Health Consultants. My 20+ years working as a nurse has been in hospital pediatric care, public health nursing, school nursing, and currently North Idaho College Head Start services. I want to help providers with issues like preventing illness, dealing with sick children/staff, medication procedures, special needs children, food safety, nutrition, allergies, emergency procedures, immunizations, mental health, childhood obesity, injury prevention, child abuse and neglect, and many more health and safety topics. I serve as vice-chair on a nonprofit day school board. My son “grew up” in child care. I live in CDA with my husband and son. Please let me know how I can be helpful to you. . . I look forward to hearing from you!
