

## QRIS Ratio Worksheet

1. List each classroom (or defined group) in your facility on the worksheet below and assign a room number for each. The room number is attached to the physical space, although different groups of children move through from year to year.
2. For each, record the number of children in each age range ever in the classroom at the same time. Pay close attention to the age ranges.
3. Record the maximum number of children cared for by a single teacher.
4. Indicate Y/N if the classroom meets the QRIS Ratios. **Base your decision on the age of the youngest child in attendance.**
5. Summarize the group sizes on the *Ratio Size Summary* below

Classroom

Classroom											
Classroom											

### **Ratio Summary**

Total Number of classrooms in facility \_\_\_\_\_ (**Total A**)

Number of classrooms that meet criteria, based on the age of the youngest child in the group \_\_\_\_\_ (**Total B**)

Total B \_\_\_\_\_ ÷ Total A \_\_\_\_\_ = \_\_\_\_\_ Percent of classrooms meeting Group Size \_\_\_\_\_ (**Total C**)

Age	QRIS Ratio
<b><i>Birth to but less than 12 months</i></b>	<b><i>4:1</i></b>
<b><i>12 months but less than 2 years</i></b>	<b><i>5:1</i></b>
<b><i>2 years to but less than 3 years</i></b>	<b><i>6:1</i></b>
<b><i>3 years but less than 5 years</i></b>	<b><i>10:1</i></b>
<b><i>Kindergarten</i></b>	<b><i>12:1</i></b>
<b><i>6 years but less than 13 years</i></b>	<b><i>15:1</i></b>
